

LibCabinet

Compact Library For Check out and Check in

With the LibCabinet you now can offer an independent library at an indoor location of your choice; your customers can have access to your books 24/7. With a combined check in and checkout function, all you need is a network cable and power outlet. The LibCabinet allows you to maintain or even significantly extend the library's reach.

The stylish, transparent doors are equipped with an electronic lock that can easily be opened by presenting a patron card to a badge reader. The customer takes the books he or she wants and just closes the door again. After closing the door, the LibCabinet prints out a receipt which tells the customer exactly which books he or she has taken and when they need to be returned. Returning a book is equally simple: present the card- open the door- return the book.

The intuitive user interface gives your customers all the information they need. An integrated thermal printer provides the patron a receipt of all transactions that have taken place so they can always check what they have returned to or have checked out from the library.

The LibCabinet communicates over the industry protocol SIP; all lending traffic is fed back to your library management system.

The LibCabinet software has a full feature maintenance mode. While in maintenance mode you can perform a full inventory, and print out inventory result. LibCabinet can be connected to P.V. Supa Centralized Management Software which provides reporting and remote control functionalities, like other P.V. Supa management software.

- › Can be placed in any location
- › Check out and check in

- › No staff needed
- › Very easy to use

- › Low maintenance
- › With relatively small investment you can extend the library's reach

LIBCABINET
