

LibMaster Baby Self-Check Unit

MODERN SELF-CHECK UNIT FOR LIBRARIES

LibMaster Baby is the most compact and attractive self-check unit available, designed specifically to meet the needs of today's libraries. The design's compact size beneficial for small libraries and children's use. The small size also accommodates flexible installation options. The frame of the unit is made of clear Plexiglas® which is available in green, blue and white. The Baby includes eye-catching, attractive LED.

LibMaster Baby can be installed on top of any existing furniture, no separate furniture is needed. An electrically adjustable table is available as an option. The receipt printer, patron card reader and pin pad can be integrated into the table.

LibMaster Baby is highly suitable for libraries planning to move from barcode technology to RFID, as the Baby can work simultaneously with both technologies. During conversion, the Baby can be used seamlessly with both technologies at the same time.

LibMaster Baby uses LibRid 3 software as user interface. LibRid 3 is a state-of-the-art software, built on the latest technologies. It allows for a very long lifespan for the device, with versatility and new features being actively developed.

LibRid 3 has a simple and intuitive user interface that guides the patrons through the check in and check out processes. The software also supports many other

› attractive plexi glass design

› Compact

› barcode, RFID

› Newest software technology

› easy, Fast and Fun

› Plug 'n' play - installation

functions, such as account information and renewal of loans. Sorting is supported with check in, allowing libraries to define specific handling of certain material, such as reserved items.

The software supports multiple languages, of which four can be active at a time. All texts on screen and on receipts can be easily modified by the library with easy-to-use tools made for that purpose.

LibRid 3 software has a remote management system, allowing all settings to be controlled from any

computer within the library network. In addition to settings, statistical reporting can also be created from any computer at any time, using a reporting tool that is included. Reports can be exported into various formats.

P.V. Supa self-check units are fully compatible with all common library systems, using a standard SIP 2 interface. LibMaster Baby is also compatible with RFID item identification and security.

GENERAL:

- › Functions: Check out, Check in, Account info, Renew, Holds, Offline- functionality
- › Item Identification: RFID or Barcode
- › Security: RFID (AFI/EAS)
- › RFID Standards: ISO 15693, 18000-3-1
- › RFID : DDM, KATVE, Tech Logic, TV2 3M, TRC, ITG, ITG2, ISO028560
- › Patron card types: Barcode, RFID, Mifare
