

Pilar Self-Check Unit

Modern RFID Self-Check Unit for Libraries

LibMaster Pilar self-check RFID unit is specifically designed to meet the needs of today's libraries. The design places emphasis on usability and ergonomics for patrons as well as maintainability and ease of service for the library staff. Attention has also been paid to appearance.

The design is both light and spacious. A glass table is used to create a sense of lightness and to make the device discreet in the library space, while still being a fully functional table top for patrons to use for their material. The table is electrically adjustable, making it ergonomic to use for children and meets US ADA standards.

P.V. Supa self-check units have a guaranteed finish, using high quality materials and hi-tech. All hardware -computers, RFID readers, receipt printer- is integrated into the furniture.

LibMaster Pilar uses LibRid 3 software as user interface. LibRid 3 is a state-of-the-art software, built on the latest technologies. It allows for a very long lifespan for the device, with versatility and new features being continuously developed.

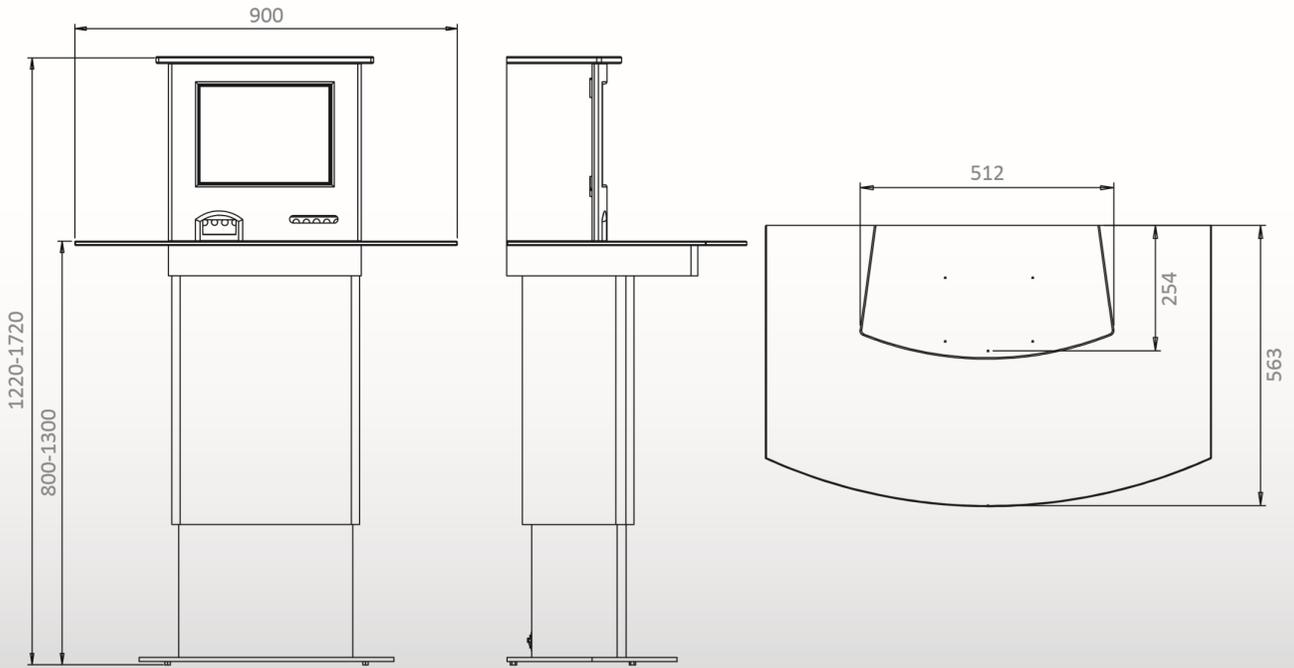

LibRid 3 has a simple and intuitive user interface that guides the patrons through the check in and check out processes. The software also supports many other functions, such as account information and renewal of loans. Sorting is supported with check in, allowing libraries to define specific handling of certain material, such as reserved items.

The software supports multiple languages, of which four can be active at a time. All texts on screen and on receipts, can be modified by the library with easy-to-use tools made for that purpose.

› Ergonomic and modern design
› Electrically height adjustable furniture

› RFID
› Newest software technology

› Stack read
› Space saving footprint

LibRid 3 software has a remote management capability, allowing all settings to be controlled from any computer within the library network. In addition to settings, RFID statistical reporting can also be created from any computer at any time, using a reporting tool that is included. Reports can be exported into various formats.

P.V. Supa self-check units are fully compatible with all common library systems, using a standard SIP 2 interface. LibMaster Pilar is also compatible with item identification and security.

General:

- > Functions: check out, check in, account info, renew, holds, offline- functionality
- > Item Identification: RFID
- > Security: RFID (AFI/EAS)
- > RFID Standards: ISO 15693, 18000-3-1
- > RFID Data Models: DDM, KATVE, TechLogic, TV2, 3M, TRC, ITG, ITG2, ISO28560
- > Patron card types: barcode, RFID, Mifare
- > Pin code: Touch screen or separate PIN-pad

Compatibility and Programs:

- > Operating system: Windows XP or 7
- > Software: LibRid 3
- > easy to use – user interface
- > Manual sorting options (4 categories)
- > Reporting and statistics management
- > Remote management
- > Customized software features
- > Centralized information management system
- > Connectivity: Protocol TCP/IP, LMS: SIP 1 SIP 2

Technical Information:

- > Touch screen size 15"
- > Printer: 80mm Thermal printer
- > Input Voltage 100-240V
- > Power usage 250 W
- > Dimensions: (L x W x h) 563x900x1220-1720 mm
- > unit weight: 90 kg
- > Color: black, other colors by order
- > Certificates:
