

Mini Library

Mini Library for Self-Check In and Out

With the Mini Library you now can offer an inexpensive independent library at an indoor location of your choice; your customers can have access to your books 24/7. With a combined Check Out and Check In function, all you need is a network cable and power outlet. The Mini Library allows you to maintain or extend the library's reach.

The stylish, transparent doors are equipped with an electronic lock that can easily be opened by presenting a patron card to a badge reader. The patron takes the books and just closes the door again. After closing the door, the Mini Library prints out a receipt which tells the patron exactly which books are checked Out and when those need to be returned. Returning a book is equally simple: present the card- open the door- return the book.

The Mini Library provides an intuitive interface. A patron presents a valid patron card to the card reader, the card is validated, and door is unlocked. The card reader can support barcode, RFID, or Mifare-D. The Mini Library utilizes a real-time inventory of the RFID tags and items are checked Out or In automatically. The patron simply closes the door and the receipt is printed after the transaction.

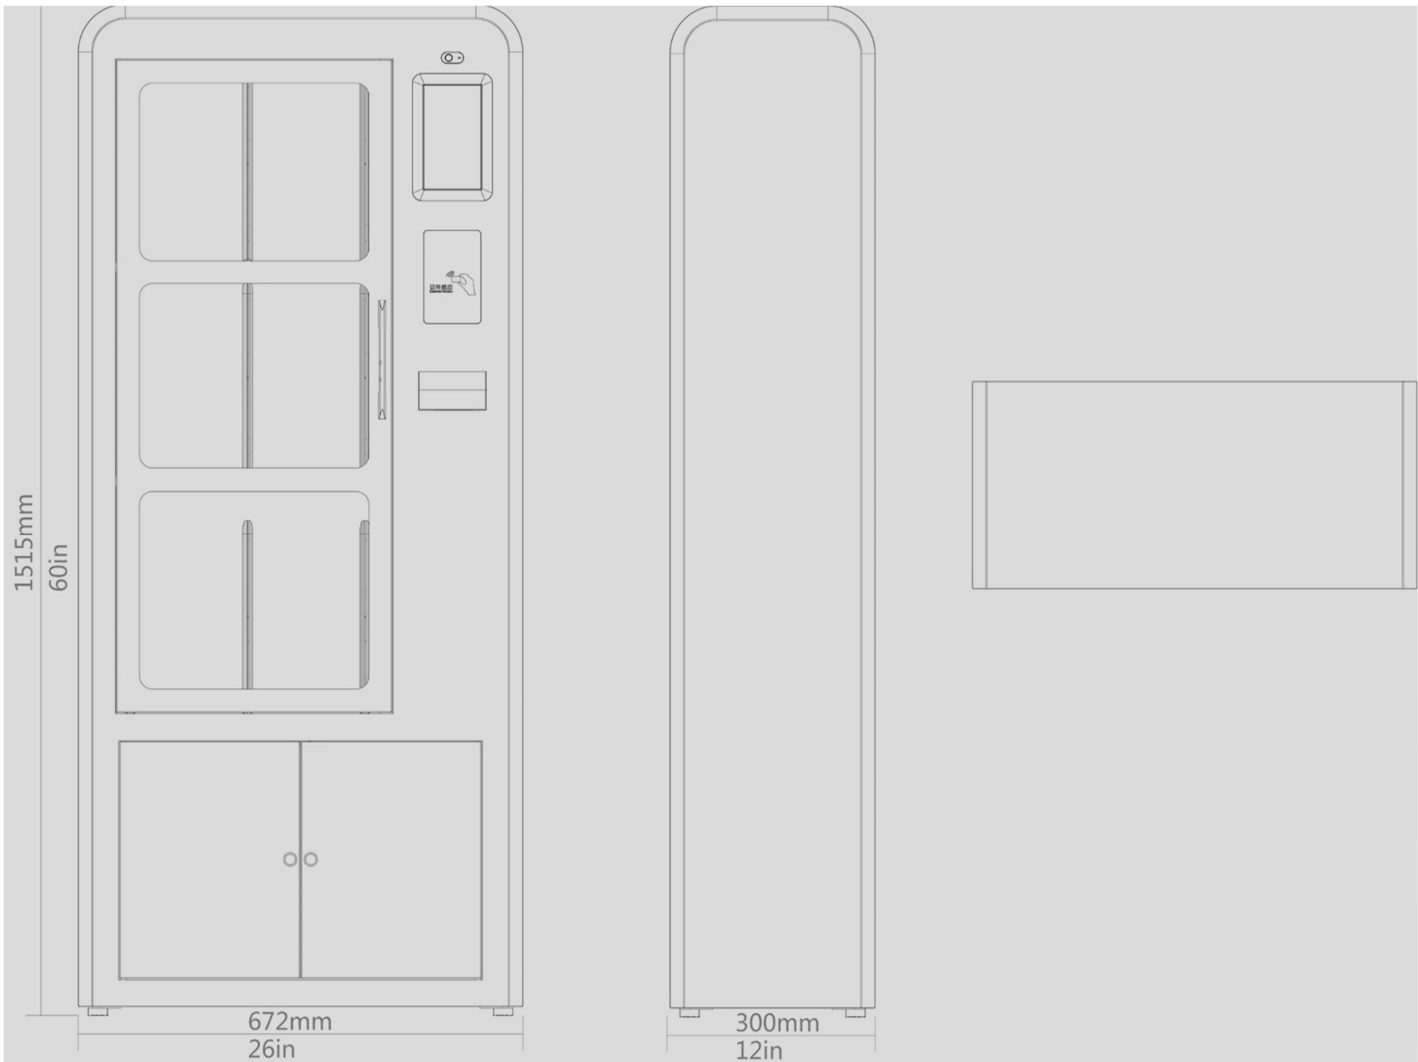

The bottom part of the unit can be used for donations.

Communication to ILS/LMS via SIP2, self-check In and check Out is 24/7, offline operation is supported as well as local database for selected collection without SIP 2 connection.

- › Can be placed in any location
- › Check Out and check In

- › No staff attendance
- › Very easy to use

- › Low maintenance
- › With relatively small investment you can extend your library's reach

General:

- > Functions: check In and check Out
- > Model Number: WT02-01A
- > Security: RFID
- > RFID Standards: ISO15693,15018000-3
- > Patron Card type: Barcode, RFID, Mifare-D
- > Pin Code entry: Touch Screen

Compatibility and Programs:

- > Operating System: Android
- > Network : TCI/IP
- > LMS: SIP2
- > Connectivity: RS232 (HF IFD), RS232/USB (card reader), LAN,WIFI,& Bluetooth (main frame)
- > Reporting and statistics management
- > Centralized Information Management System

Technical Information:

- > Capacity: 60-80 books
- > Screen Size: 7" capacitive touch screen
- > Input voltage: 220/110 V
- > Dimensions: 1513x672x300 mm (59.5x26.4x11.8 inches)
- > Storage temp: -20⁰~ 60⁰c (-4⁰~ 140⁰ f)
- > Operating temp: -10⁰ ~ 50⁰ c (-14⁰~ 122⁰ f)
- > Humidity: 5% ~ 80%
- > Power consumption: ≤ 40w
- > Frequency: 13.56 MHZ
